

CM-10 SOLAR CHARGE CONTROLLER "PHOCOS"

The CM load controller is specific to be used in small solar systems in which no disconnection of consumption is required, as in yachts, motor homes, etc. The type of charge provides the best treatment for the battery at a reasonable cost. The electronic circuit is provided with a micro controller that provides a highly efficient charging technology.

- ✚ Load display with LED.
- ✚ Large terminals (up to 16mm²)
- ✚ PWM regulation.
- ✚ Rapid loading method and flotation charge.
- ✚ Solid state overload protection.
- ✚ Reverse polarity protection.

KIND	CM10-2.1
NOMINAL VOLTAGE	12V.
FAST LOAD VOLTAGE	14.5V.
MAXIMUM MODULE CURRENT	10A.
DIMENSIONS	72.6 * 61 * 30.4mm
WEIGHT	68 gr.
MAXIMUM THICKNESS OF THE CABLE	16mm ² .
AUTOCONSUMO	≤ 4 mA
DEGREE TEMPERATURE	-40 to + 50 ° C
TYPE OF PROTECTION	IP22
